OUR ADVERTISING AGENCY.

2020

THE publishers of this Directory would call the attention of newspaper publishers and advertisers to their advertising agency. Specialization is the tendency of the present day, and it stands to reason that an agency which gives its attention to modern methods and is in close relationship with the press, can place advertising to greater advantage than those whose study is along other lines. The advertiser has only to ask for an estimate for his announcements in those papers through which he can best reach customers whose ear he desires to gain. His advertisements will be written for him, if he so desires, designs for appropriate and catchy illustrations will be submitted, and instead of keeping separate accounts with all the newspapers he need keep but one with the Agency, which undertakes not only to place the advertisement, but to see that the contract is faithfully carried out and that the advertiser gets value for his money. Special knowledge as to character, circulation, territory covered, class of readers, make up, rates, etc., are essential in placing advertising where it will do most good, and this information an agency is in a possition to gain and possess beyond any one who is not in the business. From the standpoint of the publisher the agency is also a friend. Better prices are, as a rule, offered than could be obtained by direct correspondence, advertising is secured which would not otherwise be had, by the use of electrotypes and carefully edited copy much time and correspondence is saved, a single account is kept, and his account is always paid, because a reliable agency pays for the advertising it orders even if the advertiser fails to square his account.

Long experience, honest dealing and prompt payment are the reasons why advertisers and publishers may further their interests by taking advantage of the facilities the Central Press Agency affords for placing their business.

PREFACE.

بى بى بى

HEN the publishers undertook the compilation of this work, no complete directory of Canadian Newspapers had been issued for a number of years. This fact, and the felt necessity for such a guide, explains it appearance.

Absolute accuracy cannot be expected. Publishers neglect or refuse to furnish information, newspapers spring into existence or cease publication, amalgamations take place, or other changes occur even while a book is passing through the press. It is sometimes difficult to determine whether a publication issued by some company or individual, for the promotion of his or their own interests, should rank as a periodical and be included. Nevertheless the utmost care has been taken to make this directory full and reliable, and the publishers believe it will be found as complete and accurate as any which has preceded it, and far more so than similar works produced outside Canada, upon which advertisers and others have had to rely in the past.

The figures of circulation are admittedly the most difficult problem in the compilation of a newspaper directory. The plan has been adopted of giving the circulation furnished by the publishers. When the figures are attested by affidavit the fact is so stated, and they appear throughout in bold-faced type. Where the publishers have neglected or refused to state circulation, letters are used, with a key, the information being obtained from the best available sources. The figures of population are taken from the census of 1891, the latest official returns. In the newer Provinces, where the growth has been most rapid, these figures are considerably below the mark, and they have, in some cases, been supplemented by later returns. Where new towns have sprung up, as they have done very quickly in the mining regions of British Columbia, or villages have become incorporated since the census was taken, the figures have been obtained from such sources as were available. The population of the larger cities has also been brought up to date.

The county divisions in the older Provinces are those established for municipal purposes. In British Columbia the judicial districts have been adopted, and in Manitoba the divisions are as laid down for representation in the Dominion House of Commons.

The publishers place this directory in the hands of the public, confidently trusting that it will prove both useful and reliable.

Law Imposing Postage on Newspapers.

The following are the clauses of the Postal Law passed in 1898, imposing postage upon newspapers passing through the mails in Canada, and which are now in force:—

- "26. On and after the first day of January, one thousand eight hundred and ninety-nine, newspapers and periodicals, printed and published in Canada, mailed by the publisher in the post office at the place where they are published and addressed to regular subscribers or newsdealers in Canada, resident elsewhere than in the place of publication, shall be transmitted by mail to their respective addresses as follows: -- If they are required to be transmitted by mail a distance within twenty miles from the place of publication or within a circular area of a diameter not exceeding forty miles, and if their publication is of no greater frequency than once a week, they shall be so transmitted free of postage within one or other of such areas to be selected by the publisher in accordance with regulations in that behalf to be established by the Postmaster General; if they are required to be transmitted a greater distance, or if their publication is of greater frequency than once a week, then in either of such cases postage thereon shall be paid on and after the said first day of January, and until and inclusive of the thirtieth day of June next following, at the rate of one-quarter of one cent, and thereafter at the rate of one-half of one cent, for each pound weight or any fraction of a pound weight, which shall be prepaid by postage stamps or otherwise, as the Postmaster General from time to time directs, provided that-
- "(α) such newspaper or periodical is known and recognized as a newspaper or periodical in the generally received sense of the word, and consists wholly or in great part of political or other news or of articles relative thereto or to other current topics, and is published regularly at intervals of not more than one month;
- "(b.) the full title, place and date of publication, and the distinguishing number of the issue are printed at the top of the first page, and every subsequent page, and also on any paper, print, lithograph or engraving purporting to be a supplement to it and sent with it;
- "(c.) it is addressed to a bona fide subscriber, or to a known newsdealer in Canada; and—

- "(d.) it is delivered into the post office under such regulations as the Postmaster General, from time to time, makes for that purpose.
- "2. For the purpose of determining the weights of such newspapers or periodicals, each newspaper or periodical transmitted separately through the mails shall be held to weigh not less than one-half of one ounce.
- "3. The Postmaster General may decide whether any publication, for which transmission at the rates herein mentioned is claimed, is or is not a newspaper or periodical within the meaning and intent of this section, and whether the requirements thereof have or have not been complied with in regard to it, and from time to time may make any regulations he deems necessary to give full effect to the provisions of this section, or to prevent fraudulent evasions thereof.

BRITISH COLUMBIA.

CAPITAL, - VICTORIA.

British Columbia is the largest in area of the provinces of Canada, containing 382,300 square miles. It had, at the time of the last census, in 1891, a population of 98,173, (54,061 whites, 35,202 Indians and 8,910 Chinese), but there has since been a large influx, so that to-day it is estimated to contain 150,000 people, of which 100,000 are whites and Chinese. It is not, strictly speaking, an agricultural province, though there are large tracts of fertile land, especially in the Fraser River delta, and in some of the valleys of the southern part of the province. It is however possessed of enormous wealth in its minerals, timber and fisheries. Its coast line is cut up by numerous inlets, giving it numberless harbors, equal to any in the world. Its climate ranges from a temperature on the coast in which oranges may ripen, to one in the north, or on the mountain cold as Labrador. The fertile valleys are admirably et a fruit growing and cattle ranching, and both are rapidly growing industries. The mimeral wealth of the province cannot be calculated. In 1858 gold was first discovered, and in a short time the Cariboo country was filled with miners. The workings were of the plac r class, and as these in time gave out mining became a less important industry. In recent years, hydraulic mining has been resorted to with satisfactory results, and the discovery of very rich gold and silver mines in the Kootenay country has given an impetus to mining in the southern part of the province such as few countries have ever experienced. The coal mines on Vancouver Island have been worked for years and yield a valuable fuel for steam purposes. There are also extensive deposits of coal on the mainland. The rivers teem with salmon and the canning industry is one of the most important. The deep sea fisheries have scarcely been touched. Lumbering is extensively engaged in. The Douglas fir, cedar, spruce and other woods grow to an enormous size and yield valuable timber, which is extensively exported. Since the building of the Canadian Pacific Railway the most direct route between Great Britain and her eastern dependencies lies through British Columbia, and a steady stream of travel has set in, while an extensive trade has been opened up with China, Japan and other eastern nations. The province is only in the infancy of its development and it has a brilliant future before it. Victoria, the capital, is on Vancouver Island; Vancouver, the terminus of the C.P.R., on the mainland, a place of only 12 years growth, is almost equal in size and importance. New Westminster, on the Fraser River; Nanaimo, the headquarters of the coal district on Vancouver Island; Kamloops in the ranching country in the interior; and Rossland, the chief centre of the Kootenay mining district, are also important cities. The press is represented by 73 newspapers and periodicals, and the number is being almost daily added to. Full information respecting these is appended.

MANITOBA.

CAPITAL, - WINNIPEG.

Manitoba, the prairie province, aptly described by Lord Dufferin in one of his speeches as the bull's eye of the Dominion, has an area of 64,066 square miles. It is famed for its rich agricultural lands, which are specially adapted for the growth of wheat. It was admitted as a province in the year 1870, previous to which it was under the control of the Hudson Bay Company, who carried on a large trade in furs. The few settlements were confined to the banks of the rivers, and over the prairie lands in the rear roamed large herds of buffalo. Since it became a province settlement has been rapid. In addition to native born Canadians from the older provinces, colonies have been formed of English. Scotch, Irish, Germans, Scandinavians, Mennonites, Jews, Icelanders and others. The population in 1870 was 11,963, of whom 10,400 were half-breeds and Indians. In 1891, the date of the last census, it had increased to 152,506 and it is now estimated to be about 250,000. Wheat is the staple crop and chief export. The quantity produced in 1898 was 25,312,745 bushels. Oats and barley are also extensively grown, and dairying and stock raising have become important industries. There are few minerals, but lignite has been discovered in some places, and there are also deposits of salt and petroleum. Being a prairie country there is little timber of large size and most of what is required has to be imported. In 1870 there were no railways, now the province possesses over 1000 miles, the Canadian Pacific and its branches claiming the larger portion. Manitoba possesses an excellent school system and a provincial university with which are affiliated a number of denominational colleges. It has 94 publications, as follows:

NEW BRUNSWICK.

CAPITAL. - FREDERICTON.

New Brunswick has an area of 28,100 square miles. Its population, according to the census of 1891, was 321,263. It is largely a lumbering province, and possesses vast stores of pine, spruce and other timber. Its spruce is being largely utilized for the manufacture of paper pulp. There are large areas of good agricultural land, which are being taken up as the country is cleared. The fisheries are very important, some of the rivers, which are numerous and of large size, being filled with salmon. Lobster and sardine canning is an important industry. Minerals abound, coal, gold. galena, antimony and albertite being found, the latter a black glossy mineral of great commercial value. The St. John River, which penetrates the province, is navigable for large vessels to Fredericton, 90 miles, and for small steamers to Grand Falls, 230 miles. There is considerable manufacturing done, as good water powers abound. The province possesses good schools and universities. It has 55 publications, as follows:

NORTH WEST TERRITORIES.

CAPITAL, - REGINA.

The North West Territories comprise all that region of Canada lying to the north and west of Quebec, Ontario and Manitoba, and stretching to the Arctic Ocean and the Rocky Mountains. It covers an area of 2,371,481 square miles and had a population in 1891 of 98,967, which has now increased to probably 130,000, a considerable proportion of whom are Indians and half-breeds. The part between Manitoba and the Rocky Mountains has been divided into four districts--Assiniboia, Saskatchewan, Alberta and Athabasca. The first three have representative institutions, with a joint Legislative Assembly and representation in the Canadian Parliament. They will probably soon be organized into provinces. The district between Manitoba and Hudson Bay is known as Keewatin. The remainder of the Territories was, by an Order in Council of October 2nd, 1895, erected into four districts, to be known as Ungava, Franklin, Mackenzie and Youkon. The area of the districts is as follows: Alberta 106,100 square miles; Assiniboia 85,535 square miles; Saskatchewan 107,092 square miles; Athabaska 104,500 square miles; Keewatin 282,000 square miles; Ungava, Franklin. Mackenzie and Youkon 1,642,350 square miles. The territory on the Youkon River, in the remote north-west, has recently come into prominence on account of its rich gold deposits, and the rush of gold seekers has necessitated some form of government, which at present consists of a Commissioner and Advisory Council. A large part of the territory is sterile, but the southern portion is, like Manitoba, a rich prairie country, adapted for wheat-growing, and many settlers have gone in. Ranching is an important industry, particularly in Alberta. Coal and other minerals abound, especially near the Rocky Mountains. The upper Saskatchewan is also rich in gold. Good timber is plentiful in some parts. A great portion of the territories has been only partially explored and their resources are largely undeveloped. Cariboo, musk ox and other game and fur-bearing animals are found, and the fisheries of Hudson Bay will yet prove a valuable source of revenue. There are 30 papers published.

NOVA SCOTIA.

CAPITAL, - HALIFAX.

Nova Scotia, formerly known as Acadia, possesses a unique geographical characteristic, in that every county borders on the sea and has one or more harbors. This gives the province a maritime character and hence ship-building and fishing are two of the principal pursuits of the people. Agriculture is also an important industry. The apples of the Annapolis valley are in great demand in the English market. Minerals abound, gypsum, coal, iron, gold and copper being found. A considerable quantity of pig iron is manufactured. The area of the Province is 20,550 square miles. The population by the last census, in 1891, was 450,396. Nova Scotia abounds in places of historical interest and is a favorite resort for tourists. The Island of Cape Breton offers special attractions in the way of good roads and beautiful scenery. The school system of the Province is excellent. There are a number of universities and other seats of learning of high standing. There are 91 periodicals published.

ONTARIO.

GAPITAL. - TORONTO.

The Province of Ontario. while not the largest territorially, is the most populous and wealthy of the provinces which compose the Dominion of Canada. It has an area of 219,650 square miles and a population of 2,114,321 according to the census of 1891, though the number must now be considerably larger. It has 51 counties and judicial districts, besides a large area of unorganized territory. has 13 incorporated cities and numerous towns and villages. Its municipal system is a model one, the people enjoying the greatest freedom in the management of their local affairs. The school system ranks very high. At the Philadelphia Centennial and the Chicago World's Columbian exhibitions it called forth many encomiums and was pronounced by experts to be the best in the world. In addition to the public schools there are numerous high schools, collegiate institutes, colleges, universities, normal schools and technical training institutes of various kinds. The province is chiefly agricultural, but manufacturing, mining, lumbering and fishing are extensively engaged in. Valuable gold deposits have been discovered in the north-western part of the province and in the Lake of the Woods district. The nickle which comes from Sudbury is the best in the world. The western part of the province has valuable deposits of petroleum and salt. Iron abounds everywhere, and copper, lead and other minerals are found. The number of newspapers and periodicals regularly published is 672.

PRINCE EDWARD ISLAND.

CAPITAL, - CHARLOTTETOWN.

Prince Edward Island is the smallest of the provinces in the Dominion of Canada, having an area of only 2,000 square miles. It is, however, the most thickly populated and one of the most productive. There is scarcely a foot of land which cannot be cultivated and the soil is uniformly rich. It follows that agriculture is the chief employment of the people. The oats and potatoes produced are famous, and the foreign demand is large and constantly increasing. Hay is also largely grown and stock-raising is an important branch of industry. The horses, cattle and sheep of the Island are superior in quality and are largely exported to the United States and elsewhere. Fishing is an important industry, and large quantities of mackerel, cod, herring, hake, oysters and lobster are exported. The temperate and salubrious climate, good roads, fine scenery and excellent sea bathing are making Prince Edward Island more and more a resort for tourists and health seekers. A government railway traverses the island from end to end, with several branches, and a powerful steamer, specially built to force its way through the ice, furnishes communication with the mainland during the winter. A tunnel under the Straits of Northumberland has been projected and surveys made, but as it would be a very expensive undertaking its construction is yet in the future. The Province has 17 newspapers. Its population, according to the last census, was 109,078.

QUEBEC.

CAPITAL, - QUEBEC.

The Province of Quebec is the oldest settled portion of the Dominion. It was discovered in 1534 when Jacques Cartier ascended the St. Lawrence and visited the Indians at Hochelaga, now Montreal. It began to be colonized from France in the beginning of the seventeenth century, and the hardy pioneers pushed their way west through the great lakes to the plains of the North West and down the Mississippi to the Gulf of Mexico. There is much good agricultural land in the Province of Quebec and farming is extensively carried on, especially in the Eastern Townships. Minerals abound. asbestos and phosphates being two of the most important. Water power being abundant manufacturing is extensively carried on. Pulp wood is plentiful and paper manufacturing is destined to become one of the leading industries. Lumbering is extensively engaged in throughout that part of the province lying north of the St. Lawrence and Ottawa rivers. Fishing is also an industry of some importance in the Lower St. Lawrence and Gulf. The scenery in many places is grand, especially on the Sagnenay, which is a famous trip for tourists. The area of the province is 227,500 square miles, its population in 1891 was 1,488,535, largely French Canadian and Roman Catholic. The number of newspapers published is 182, the following being the particulars:

NEWFOUNDLAND.

CAPITAL, - ST. JOHN'S.

Newfoundland, discovered by John Cabot in 1497, is the oldest colony in the British Empire. Its original inhabitants were the Beothuks, now extinct. As early as 1504 the hardy fishermen of Brittany and Normany plied their calling off its shores, but Sir Humphrey Gilbert was the first Englishman who made any attempt to colonize, which he did in 1537. The settlers had a hard struggle for existence, having to defend themselves against the French, and it was not till 1729 that England appointed a Governor and formally recognised the colony. It has not progressed as rapidly as its resources would justify, but within the last few years more progress has been made and the island doubtless has a great future. It is the only part of British North America not included in the Dominion of Canada.

Newfoundland is best known on account of its fisheries. The cod fishing on the banks is the best in the world, The value of the fish taken, exclusive of home consumption and what is sold to foreigners for bait, is over six million dollars per year. The number of people engaged in the fisheries is over fifty-three thousand. Salmon, herring and lobster fishing and sealing are also carried on. The island is rich in minerals, copper of fine quality, iron, nickel, lead, gypsum, coal, sulphur, marble, granite, limestone, slate, petroleum and asbestos being found. Game is plentiful. The construction of a railway across the island, 550 miles, which has recently been opened for traffic, has brought into the market large areas of good agricultural lands, and has rendered accessible stores of valuable timber and pulp wood. The western terminus of the road is only 90 miles distant from Sydney, C.B., with which a fast steamship service has been established. By this means the ocean voyage has been shortened and the dangers of the Gulf of St. Lawrence avoided.

The population at the census of 1891 was 202,040. It is now estimated to be 210,000. There were on the shipping register 2,340 vessels, aggregating 104,379 tons. There are 353 post offices and the newspapers and periodicals regularly issued number 16.

NEWS AND JOB PRINTING PRESS

PRINTS

6 COL. QUARTO SHEET.

EASILY

POWER.

The Best Press Ever Offered to Canadian Country Printers.

Note a Few Points of Excellence:

- 1. There is no gearing on the feeder's side of the press, the feeder can stand close to the press and be absolutely safe from all danger of being injured.
- The form rollers are geared, thus insuring perfect inking of forms.
- In this press all side levers are dispensed with.
- There is never any oscillation of the bed, which is absolutely rigid when the impression is taken, it being automatically locked; also the impression can be quickly changed at any corner of the bed
- The cylinder is held to the rails by a new double spindle cross head, which prevents any cramping which might possibly be in the single spindle head.
- All gears are cut from the solid block, which insures a smooth running press; all the cylinder racks are cut
- The gripper motion is geared, hence is positive, thus making the register line absolute.
- It is the easiest running press offered to the printer—a boy can easily run it. It has five ink rollers; 3 2-in. distributors and 2 3-in. form rollers, and gives a good distribution; also each press is fitted with a firstclass well ink fountain.
 - 9. The forms can be corrected on the bed of this press with less trouble than any other cylinder press made.

Each press will be complete with a full set of cast rollers, or two roller moulds, cylinder blanket and full set of

It works for the Trail Blazer as well as the bloated and chicken-fed capitalist.

It aims to be on the right side of everything, and believes that hell should be administered to the wicked in large doses.

It has stood the test of time, and the pay-streak is growing wider.

The annual assessment is only \$2.00, and no palace, cabin or shack is complete without it.

A vein of Job Printing is worked for the benefit of humanity and the editor.

Come in and see us, but do not step on the fighting editor's bull pup; he is small but savage.

THE LEDGE is widely circulated in Europe, and abroad is one of the best known Canadian papers. The proprietor also publishes a paper at SANDON, called THE PAYSTREAK.

with unequalled facilities for reaching the people of the County of York. It contains the local news of each section, general county news, news of the world in brief, the Talmage sermon, first class serial story, latest humor, special articles, and many other interesting features; and goes direct into the homes of the wealthy and progressive farmers of the "banner county of Canada." More than 20,000 people read The Leader and Recorder every week and many file it carefully away for future reference. The office is open to the public every Thursday afternoon, whilst the papers are being folded, addressed and mailed. How many other newspapers in America invite inspection in this way? The Leader and Recorder reaches many people who hardly ever see a daily paper, just as the daily reaches people who do not take weeklies regularly.

PRINTING PRESSES

For All Classes of Letterpress Work.

TheMiche

HIGH-SPEED, FOUR-ROLLER, FRONT DELIVERY, TABLE DISTRIBUTION, BOOK AND JOB PRESS. Made in eleven sizes, from 26x36 to 48x65. This press is built to do the finest class of printing, and is specially adapted for half-tone work both in black and in colors. It is the standard Flat-Bed Press of the world to-day, as the producer of a greater quantity and finer class of work than any other press on the market.

TheWiche

HIGH-SPEED, TWO-ROLLER, FRONT DELIVERY, TABLE DISTRIBUTION, BOOK AND JOB PRESS. Made in six sizes from 30x42 to 45x62. This press is designed for a little cheaper class of book and job work than our Four-Roller, differing only in the number of form rollers, having two instead of four; otherwise it is similar in all its other features, and is faster.

Thewiche

HIGH-SPEED, TWO-ROLLER, REAR DELIVERY, "RACK AND PINION" DISTRIBUTION JOB AND NEWS PRESS.
Made in five sizes, from 30x42 to 43x55. Its method of distribution is "rack and pinion cylindrical" instead of "table."
The class of work to which it is more specially adapted is newspaper and poster work. Felt packing used. It is very fast.

The Vigne

HIGH-SPEED PONY PRESS, TWO-ROLLER, REAR OR FRONT DELIVERY, "RACK AND PINION" OR "TABLE" DISTRIBUTION. Made in two sizes, 25x30 and 26x34. This press has a well-earned reputation for remarkable speed and the superior quality of work it does.

OUR NEW SHEET DELIVERY which delivers the sheet Printed Side Up or Down, as may be desired, we put on all our presses with the exception of the "Job and News" and the smaller sized "Pony." This adds but little to the cost of the Press to the purchaser, and is a great convenience.

THE HALIFAX HERALD

(8, 10 and 12 pages as required)

Is the only evening paper in Eastern Canada that publishes a sworn statement of its circulation for the information of advertisers, and was the first paper in Canada to have its books subjected to expert investigation and to get its paid circulation guaranteed by the Advertisers Guarantee Company. Following is a statement of its sworn circulation during 1898:

Month.	Days.	For Month.	Daily Aver'ge.	Month.	Days.	For Month.	Daily Aver'ge.
January		106,015	4,077	August		148,849	5,513

THE HALIFAX HERALD THE EVENING MAIL

Are the only papers in Nova Scotia set up by the Merganthaler linotypes and equipped with duplex fast presses. Besides the Hoe Web press and complete stereotyping outfit, the Herald Company have recently installed a Cox Duplex Angle Bar Press with all the latest improvements. The plant of the entire establishment is driven by gas and electricity.

THE EVENING MAIL

(12, 14 and 16 pages as required)

Is the only evening paper east of Montreal which publishes sworn statements of its circulation, and whose advertisers also enjoy the protection of the Advertisers Guarantee Company. The Mail is typographically one of the handsomest papers in Canada, and is so made up that every advertisement is "next to reading." Its sworn circulation during 1898 was:

Month.	Days.	For Month.	Daily Aver'ge.	Month.	Days.	For Month.	Daily Aver'ge.
January		97,300	3,742	August		111,710	4,137
February		89,620	3,734	September	. 25	103,050	4,122
March	27	102,240	3,786	October	. 26	102,252	3,932
April	25	115,430	4,617	November	. 25	98,974	3,955
May	25	124,220	4,964	December	. 25	100,997	4,039
June	26	114,006	4,384				
July	25	122,656	4,996	Total	. 306	1,282,455	4,193

At the last census there were 5,181 dwelling houses in Halifax, and as the Mail's circulation is almost entirely confined to Halifax City, the standing of the Mail as a popular family paper may be seen from this striking fact, that, while, according to the last census, there are 5,181 dwelling houses in Halifax the Mail's sworn circulation, confined almost entirely to Halifax City, exceeds 4,000 copies.

The Endeavor Banner was started in 1891 as the official organ of the Quebec Provincial C. E. Unions, and since that it has constantly increased in its usefulness until now it furnishes news items from ALL parts of the Dominion. It has regular provincial correspondents, besides many others who contribute items each month. A glance at any issue of the paper will convince any unbiased mind that it is a bright, up-to-date paper. Send for a sample copy and see for yourself. It confines itself strictly to Christian Endeavor work, and is therefore able to give more news in its pages than any other publication of its kind. It is a Canadian C. E. paper, published in the interests of Canadian Endeavorers. The Notes on the Uniform Christian Endeavor Topics are written by prominent men in the movement, and very helpful thoughts are given. The Junior Department is edited by Miss Lena L. Woodill, Halifax, N.S., the Maritime Junior Superintendent, with the Provincial Superintendents as contributors. The Puzzle Corner is very interesting, prizes being given to the successful competitors.

THE NEEPAWA PRESS

Is admitted by all critics to be the most up-to-date paper, in both style and matter, that is published in Manitoba. It has few, if any, equals in any town of similar size anywhere. What makes the Press a Peerless Paper in its place, is a capable editor and manager of a quarter of a century's experience in Newspaper and Job Printing work in city and country offices, devoting his every talent with energy and enthusiasm to his work. What makes such a paper a possibility in a place like Neepawa, with less than 2,000 population, is the compact settlement of well-to-do and intelligent English-speaking farmers surrounding the town, into the homes of every one of whom the Press goes regularly, twice a week, giving them more local news in each issue than any of its provincial contemporaries do in their tardy once-a-weeks, besides an extensive summary of the world's news compiled up to the day of publication. Thus the Neepawa Press satisfies the reading wants of the farming and working classes, by giving them eight pages of local news and advertising more promptly and in better form than city weeklies, and much cheaper and more suitable than the dailies. Its advertising columns are extensively used, and those who do so judiciously get good results. Rates are \$100 per column per year for home-print pages, and \$50 for ready-print pages, for once-a-week insertions; or \$150 per column per year for home-print, and \$75 for ready-print pages for twice a week. The Slater Shoe Co Montreal. You are well aware that we have been quite extensive advertisers for the past half century, and that among the mediums we have consistently and continuously used during that time The GLOBE has taken, a foremost rank. It goes without saying that we should not have continuously used the Daily and Weekly Globe as a medium did not we consider that it catered to a large and widely scattered constituency which it is our desire to reach. To epitomise, we would say in a few words, that we consider the GLOBE one of the best advertising mediums in Canada.

Your Mr. A. C. McPhee has asked us to send you our expressions of your paper, and in doors so, would say very briefly we consider "The Clobe" one of the best, if not the best, advertising medium in Canada. The fact that we have increased our contract the coming year, over previous years would be an indication of what we think of the value of "The Clobe" as an advertising medium.

Mr. Norman G. Ellis, Sec.-Treasurer, writes:—We take great pleasure in writing you to state the results of our advertising in your paper, especially for our Christmas trade. As you know, we contracted for a page in your illustrated Saturday edition; the result in actual returns that we could trace to this "ad" simply astounds us. We might say that our cash returns from this particular "ad" were five times greater than we ever expected, and we attribute our exceptionally large increase in December to the results of our advertising in your paper, and would on no account let our contract expire. Hoping that you can do as well for your other advertisers as you have done for us, believe us to be steady advertisers in The Globe.

Mr. John N. Lake writes:—I think it is only fair to say that, while I have been advertising for nearly thirty years as a real estate dealer, I have always found The Globe one of the best mediums to reach the public. But of late I have had special reason to praise your paper. I had a special piece of property for sale, also a patented article suitable for the farmers. I advertised an equal number of times in 5r different papers, all professing to reach the parties desired, and got more inquiries from Globe readers than all the others combined.

Mr. Hunts, Advertising Manager of Columbia Bicycles, says:—We are well pleased with our advertising in The Globe this year, and selected your publication because inquiry and observation led us to believe that The Globe was one of the best advertising mediums in Canada.

Mr. John E. Taylor, Sec.-Manager. says in his letter of June 6th, 1898:—Of all the large dailies for advertising we prefer The Globe,

We have always included The Globe in our list for Canada, now some twenty years, as we have always known it to be one of the leading papers of the Dominion.

We hold newspaper advertising to be the strong arm of success in making and holding a business similar to ours; hence, we have used The Globe for such purpose continually for years, deeming its circulation the largest in its field, and its constituency of the best.

If you wish to use this interview so as to state that "we have received from one catalogue ad. in The Globe more mail replies than from any other morning paper in Canada" you may do so, for it is a fact, to which I cheerfully subscribe.—J, P, MComnell, Adv. Manager.

The above is enough to convince the thoughtful advertiser who wants results that every copy of The Globe is like a well directed bullet, it hits the bull's-eye and scores.

THE DAILY GLOBE COVERS THE RICHEST FIELD IN CANADA AND AS AN ADVERTISING MEDIUM HAS NO EQUAL IN THE DOMINION.

Results Count, and that is why its advertisers are pleased patrons.

Sworn statement of circulation and rates cheerfully furnished,

THE EDUCATIONAL REVIEW

is the only educational paper published in the At-

lantic Provinces of Canada. It has steadily grown in influence and circulation since its establishment, over twelve years ago. It reaches every live teacher in Nova Scotia, New Brunswick, and Prince Edward Island. Published monthly at \$1.00 per annum.

G. U. HAY, MANAGING EDITOR, ST. JOHN, N.B.

"Up from St. John, New Brunswick, the briskest and one of the best cities east of Boston, there has come to the Bangor Daily News office one of the best specimens of what an educational paper should be that has been seen in a long time. It is a copy of the EDUCATIONAL REVIEW for April, 1899, a small quarto monthly that is devoted to the educational interests of such of Her Majesty's domain as is situated east of the "States." It is really a model of its kind. New England has a few fairly good papers that are issued for the benefit of those who teach or who desire to advance the cause of education, but as a rule, they are filled with many fine spun theories regarding the how and why of things, and contain very few facts. The EDUCATIONAL REVIEW, which is ably edited by Mr. G. U. Hay, reverses the New England custom and deals with things practical. It tells something that people want to know. Instead of trying to teach people how to educate, it educates. It handles the subject and ignores the shadow. For these reasons the EDUCATIONAL REVIEW is a valuable addition to current literature and contains much matter that makes the paper worthy of preservation for future reference.—Bangor Daily News.

"What we said some time ago of the Old South Leaflets as affecting. United States readers is especially applicable to this experiment of Mr. Hay's as affecting students of our own annals. At a nominal cost (10 cents a number) one is favored with a veritable treasury of tid-bits by our foremost historians, dealing authoritatively with what is most noteworthy in the records of the Old Régime and the New."—Montreal Gazette.

19 BOARD OF TRADE, . MONTREAL

Butler's Journal

FREDERICTON, N.B.

Is devoted to the encouragement of Home Literary Talent, Social Reform and a Democratic form of Government, gradually leading up to the ultimate goal and inalienable right of Canada, as for all nations—complete independence. Strikingly original and humorous without being coarse. The friend of the laborer against titled aristocracy, combines and monopolies. Circulates throughout a large extent of territory and is an excellent advertising medium.

Terms, 35 cts. per year. Published monthly.

MARTIN BUTLER,

Oldest Established in Province.

The Central Press Agency, City:

DEAR SIRS:—We have just got through our immense Coupon Competition, which, as you know, we have been running through the past year, and which we advertised extensively from the Atlantic to the Pacific under contract with yourselves.

We thought it only just to take this opportunity of letting you know how much this contract helped us in the success which attended our efforts, because we used practically no other method of advertising the

details of the scheme.

Yours truly,

JUNE 7TH, 1899.

Central Press Agency, Toronto, Ont.:
Gentlemen:—Throughout the entire course of our dealings with your firm we have found you uniformly painstaking and careful in looking after our interests. At all times we have been able to readily verify the insertions of our advertisements, and have been treated with great courtesy. Your business-like methods have given us every satisfaction, and the system which you pursue as to filing papers and checking advertisements is certainly most complete, and leaves no room for doubt as to the thorough manner in which the work is performed.

We beg to wish you every success in the future, and trust that from the present bright prospects for business, you will reap an abundant

harvest.

Yours truly,

THE DOCTOR WARD CO., LIMITED, JNO. R. ALLAN, Secretary.

THE TORONTO WORLD

EXTRACT FROM THE TORONTO INVESTIGATOR, NOVEMBER, 1899.

"The Toronto World has a larger circulation than any morning paper in Canada, and for years has furnished detailed sworn statements thereof. Anyone is at liberty at any time to examine The World's circulation books, mail sheets, paper account, and press room. That is the sure test of circulation, and papers that refuse this test have probably made claims that they cannot justify. It circulates at this writing (October, 1899) over 27,000 copies daily. The progress in this direction is best illustrated by this table:

SWORN CIRCULATION STATEMENT OF THE TORONTO WORLD.

1893 1	2,732 copies	daily,	average.
1895 I	9,204 "	64	64
1897 2	3,313 "	6.6	6.6
1800	6.076 "	6.6	6.6

"THE WORLD is a morning paper and is nothing else, as The Telegram is an evening paper and nothing else. That is why the advertisers of Toronto couple them together in placing their business. They cover the whole field.

"THE WORLD has only one edition and only one price. It gets out no holiday numbers, no special numbers, it has no weekly edition, it gives no premiums, it is not engaged in peddling books by subscription or other methods, it owns no patent medicines, is connected with no mining or railway companies—it devotes its entire energy to getting out one good morning paper every day in the year. And that of itself is no small undertaking."

The World is anxious to do business with advertisers, and to give them better value for their money than is offered elsewhere.
